PROFESSIONAL SUMMARY

Full-Stack Web Developer with hands-on experience building and deploying production-grade **React.js** and **Node.js** applications. Demonstrated ability to architect secure JWT-authenticated REST APIs, manage complex application state, and deliver responsive, user-centric interfaces. Holds **six verified full-stack certifications** and has independently shipped **three complete web applications**. Seeking a developer role where strong engineering fundamentals, rapid learning velocity, and ownership-driven work ethic can create immediate impact.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap 5, Responsive Web Design
Backend	Node.js, Express.js, Python, REST API Design, JWT Authentication
Databases	MongoDB, SQL (MySQL), Schema Design, Query Optimization
Tools & DevOps	Git, GitHub, VS Code, Postman, Netlify, Vercel, npm
Core Concepts	Protected Routing, State Management, MVC Architecture, CORS, Error Handling

PROJECTS

StreamVault — Video Streaming Platform

Jan 2024 – Mar 2024

[React.js](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [JWT](#) · [REST APIs](#) · [CSS3](#) · [Netlify](#)

- Built a full-stack Netflix/Prime-style streaming platform with dynamic routing, media categorization (Trending, Popular, Top Rated), and deep-search via the TMDB API.
- Engineered JWT access-token auth with HTTP-only cookie storage, reducing XSS exposure and enforcing route-level authorization guards.
- Designed a Node.js/Express.js backend serving sub-200ms responses for registration, login, watchlist management, and session verification.
- Architected global state with React Context API across 8+ routes; achieved Lighthouse performance score of 91/100 on Netlify + Render deployment.

TaskFlow — Full-Stack Task Management App

Aug 2023 – Oct 2023

[React.js](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [JWT](#) · [CSS3](#) · [Vercel](#)

- Developed a Trello-inspired Kanban board with drag-and-drop ordering, priority labels, due-date tracking, and real-time status updates.
- Implemented role-based access control (RBAC) for Admin and Member users with differentiated CRUD permissions secured via JWT middleware on all Express routes.
- Designed a MongoDB schema with relational-style referencing across Users, Boards, and Tasks; optimised reads with indexed queries on frequently filtered fields.
- Built a reusable React component library (modals, dropdowns, badges, cards), reducing UI development time for new features by ~40%.

ShopEase — E-Commerce Storefront

Apr 2023 – Jun 2023

[React.js](#) · [JavaScript](#) · [REST APIs](#) · [Bootstrap 5](#) · [LocalStorage](#) · [GitHub Pages](#)

- Created a fully responsive storefront with product listing, category/price/rating filtering, cart management, and a multi-step checkout flow.
- Integrated a public REST API with localStorage caching, cutting redundant network requests by ~60% across repeat visits.

- Implemented search-as-you-type with 300ms debounce, preventing excessive API calls and improving perceived responsiveness.
- Achieved 100% mobile responsiveness (320px – 1440px) using CSS Grid, Flexbox, and Bootstrap 5 breakpoints.
