PROFESSIONAL SUMMARY

Full-Stack Web Developer with hands-on experience building and deploying production-grade React.js and Node.js applications. Demonstrated ability to architect secure JWT-authenticated REST APIs, manage complex application state, and deliver responsive, user-centric interfaces. Holds six verified full-stack certifications and has independently shipped three complete web applications. Seeking a developer role where strong engineering fundamentals, rapid learning velocity, and ownership-driven work ethic can create immediate impact.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap 5, Responsive Web Design
Backend	Node.js, Express.js, Python, REST API Design, JWT Authentication
Databases	MongoDB, SQL (MySQL), Schema Design, Query Optimization
Tools & DevOps	Git, GitHub, VS Code, Postman, Netlify, Vercel, npm
Core Concepts	Protected Routing, State Management, MVC Architecture, CORS, Error Handling

PROJECTS

StreamVault — Video Streaming Platform

Jan 2024 – Mar 2024

[React.js](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [JWT](#) · [REST APIs](#) · [CSS3](#) · [Netlify](#)

- ▶ Built a full-stack Netflix/Prime-style streaming platform with dynamic routing, media categorization (Trending, Popular, Top Rated), and deep-search functionality powered by The Movie Database (TMDB) API.
- ▶ Engineered a secure authentication system using JWT access tokens with HTTP-only cookie storage, reducing XSS vulnerability exposure and implementing route-level authorization guards.
- ▶ Designed a Node.js/Express.js backend with RESTful endpoints handling user registration, login, watchlist management, and session verification — serving sub-200ms average response times.
- ▶ Architected global state management using React Context API to handle loading states, API errors, retry logic, and user session across 8+ distinct page routes.
- ▶ Deployed frontend on Netlify and backend on Render with environment-separated configs; achieved Lighthouse performance score of 91/100.

TaskFlow — Full-Stack Task Management App

Aug 2023 – Oct 2023

[React.js](#) · [Node.js](#) · [Express.js](#) · [MongoDB](#) · [JWT](#) · [CSS3](#) · [Vercel](#)

- ▶ Developed a Trello-inspired task board application with drag-and-drop task ordering, priority labels, due date tracking, and real-time status updates across Kanban columns.
- ▶ Implemented role-based access control (RBAC) allowing Admin and Member user types with differentiated CRUD permissions, secured via JWT middleware on all protected Express routes.
- ▶ Designed a MongoDB schema with relational-style referencing between Users, Boards, and Tasks collections, optimizing read performance through indexed queries on frequently filtered fields.

- ▶ Built a reusable React component library (modals, dropdowns, badges, cards) reducing UI development time for new features by an estimated 40%.

ShopEase — E-Commerce Storefront

Apr 2023 – Jun 2023

[React.js](#) · [JavaScript](#) · [REST APIs](#) · [Bootstrap 5](#) · [LocalStorage](#) · [GitHub Pages](#)

- ▶ Created a fully responsive e-commerce frontend featuring product listing, filtering by category/price/rating, cart management, and a multi-step checkout flow.
- ▶ Integrated a public products REST API with client-side caching via localStorage, cutting redundant network requests by ~60% across repeat page visits.
- ▶ Implemented search-as-you-type with debouncing (300ms), preventing excessive API calls and improving perceived UI responsiveness.
- ▶ Achieved 100% mobile responsiveness across tested screen sizes (320px–1440px) using CSS Grid, Flexbox, and Bootstrap 5 breakpoints.

EDUCATION

Bachelor of Science — Mathematics, Physics & Computer Science | [Hindustan Shipyard Degree College](#)

2021 – 2024

GPA: 8.4 / 10 · Relevant Coursework: Data Structures, Database Management Systems, Computer Networks, Operating Systems, Object-Oriented Programming

CERTIFICATIONS
